TRAINING PROPOSAL · 96 HOURS · 12 WEEKS

AI CREATORS

صُنّاع المحتوى

AI-powered content creation, digital marketing, automation and freelancing: from a client's idea to a finished, published campaign

GREEN CIRCLE
be aware..be secure

*Proposed host, subject to mutual agreement. AI Creators is a working title.

The program at a glance

96
training hours

32
sessions of 3 hours

70%
hands-on practice

12
weeks, including 1 buffer week

What success looks like

85% complete · +25-point average skills gain · every participant leaves with a portfolio of 8 pieces of work (proposed targets)

The partnership

LEAD	PROPOSED HOST*	PARTICIPANTS
Green Circle	Jubilee Institute	20 per cohort

What Green Circle adds to the partnership

AI expertise	Designs and leads all AI content, labs and coaching
A ready program	11 modules, 96 hours, sessions, tools and a capstone, already designed
Program leadership	One accountable lead for delivery, quality and reporting
Delivery record	References: USAID, CFYE, MoDEE, Q2 Impact
Secure by default	“be aware..be secure”: privacy, credential safety and honest AI labelling in every module

Value for Jubilee Institute

- A complete, hands-on AI content program on its site, with no design burden
- Participants who leave with finished work and portfolios
- A Demo Day the Institute can host and showcase
- Measured, reported results it can cite
- A curriculum that can run again with new cohorts, if agreed

Many use AI. Few use it for real work

Typical starting point	What the program builds
Using AI to get quick answers	Using AI to produce work a client can use
Tool tips picked up from social media	A structured path from idea to published campaign
Accepting whatever the tool returns	Checking facts, editing drafts and labelling AI content
No proof of what they can do	A portfolio, a capstone project and a live presentation

The starting point is an assumption; the pre-assessment in session 1 confirms it for each cohort.

From a client's idea to a published campaign

01
Research & Client Brief

02
Prompting & Content

03
Characters, Voice & Visuals

04

05
AI Video & Editing

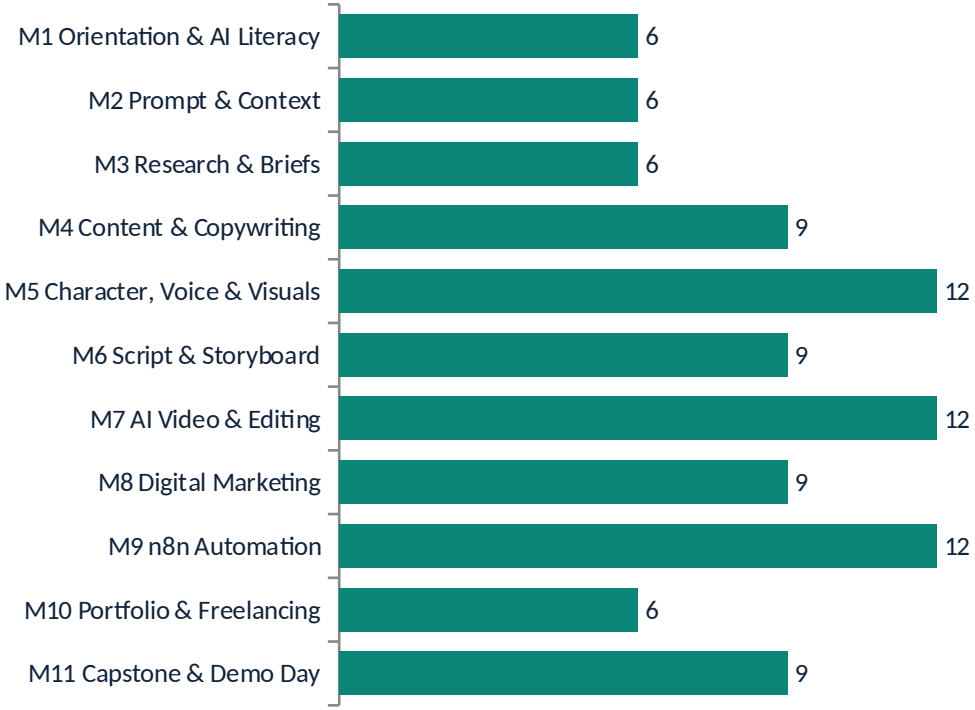

06
Digital Marketing

07
n8n Automation

08
Portfolio & Capstone

Why this focus: small businesses, NGOs and community initiatives need steady content but often lack the time or skills to produce it. AI Creators trains participants to deliver that work with AI tools, step by step, the way a small agency works with a real client.

Eleven modules, 96 hours per participant

How it is delivered

32 sessions × 3 hours, three a week

28.5 h concept and demo

67.5 h hands-on practice

Every session follows the same loop: see it, try it, build it, show it.

Completion = 80% attendance + capstone. Certificate of completion (proposed).

Modules M1–M6 at a glance

Module	Hours	Key tools	Participants produce
M1 **Orientation, Pre-Assessment & AI Literacy**	6	ChatGPT, Gemini, Google Forms	Pre-assessment, signed Responsible AI pledge, assistant comparison log
M2 **Prompt & Context Engineering**	6	ChatGPT, Gemini, Google Docs	Prompt library (10+ prompts) and one context pack
M3 **AI Research, Fact Verification & Client Briefs**	6	Gemini, ChatGPT, Google Docs	Verified research sheet and a one-page creative brief
M4 **AI Content Creation & Copywriting**	9	ChatGPT, Gemini, Canva	Content pillars sheet, one carousel, five captions with CTAs
M5 **AI Characters, Voice & Visuals**	12	ChatGPT / Gemini image generation, Canva, Recorded narration (phone or USB mic), ElevenLabs	Character sheet, voice profile, six-image visual set, 30-second narration
M6 **Scriptwriting, Storytelling & Storyboarding**	9	ChatGPT, Gemini, Google Sheets, Canva	Script and storyboard with shot list

Modules M7–M11 at a glance

Module	Hours	Key tools	Participants produce
M7 **AI Video Production, Editing & Publishing**	12	Google Flow, CapCut, Canva	Edited 30–45 second video and a completed publishing checklist
M8 **Digital Marketing Foundations**	9	ChatGPT, Gemini, Google Sheets, Canva	Audience persona, four-week content calendar, campaign one-pager
M9 **Automation with n8n**	12	n8n (program-hosted), Google Sheets, AI model node	Working workflow, a hand-drawn or digital flow diagram, and a one-page explanation
M10 **Vibe Coding, Portfolio & Freelancing**	6	ChatGPT / Gemini (canvas features), GitHub Pages, Google Docs	Published portfolio or landing page, three service packages, client message templates
M11 **Capstone Studio, Post-Assessment & Demo Day**	9	All program tools	Full capstone package and final presentation

Google Flow and AI voice tools are used where account access allows; otherwise the trainer demonstrates them and participants use recorded narration and their own footage.

Twelve weeks, three sessions a week

Foundations	Create & produce	Market	Automate & launch	Capstone
M1–M3	M4–M7	M8	M9–M10	M11
Weeks 1–2	Weeks 3–7	Weeks 7–8	Weeks 8–10	Weeks 10–11

1	2	3	4	5	6
W1	W2	W7	W9	W11	W12
Orientation and pre-assessment	Client brief approved	Edited video	Working automation	Post-assessment and Demo Day	Buffer for make-ups

Sessions run three times a week (proposed). Each module's output feeds the team's capstone, so the final weeks are for finishing, not starting.

Every session ends with something made

1. See it

Short concept and live demo

2. Try it

Guided exercise in pairs

3. Build it

Apply it to the capstone client

4. Show it

Share, get feedback, improve

A typical 3-hour session

12 structured exercises, one capstone client per team, and a portfolio folder that grows every session.

The AI tools participants learn to use

AI assistants

ChatGPT · Gemini

Research, prompting, writing and editing

Design & images

Canva · ChatGPT / Gemini images

Carousels, characters, brand visuals

Video

Google Flow · CapCut

Generated shots, editing, captions

Voice

ElevenLabs · recorded narration

Voice profiles and 30-second narration

Automation

n8n · Google Sheets

Form → AI → Sheets content workflow

Web & portfolio

AI canvas · GitHub Pages

A published one-page portfolio

Capstone: an AI-powered mini digital agency

Teams of 3–4 choose a real or realistic client (a small business, NGO, local shop or community initiative) and deliver a complete campaign package.

Discover	Plan	Create	Automate & launch	Present
1 Research	5 Content strategy	8 AI character	16 n8n automation	18 Portfolio case study
2 Client brief	6 Content calendar	9 Voice profile	17 Landing page	19 Final presentation
3 Audience persona	7 Marketing campaign	10 Visual assets		
4 Marketing objective		11 Video scripts		
		12 Storyboard		
		13 AI video		
		14 Edited final video		
		15 Social posts		

19 deliverables. Team roles rotate: strategist · content lead · visual & video lead · automation lead.

Measuring real change, before and after

BEFORE

Session 1

Knowledge check (50 pts) and a 30-minute practical task (50 pts), plus a self-rating. Sets each person's baseline; not graded.

AFTER

Session 32

Same structure and scoring, with parallel questions and a new brief. Gain = post minus pre, out of 100.

LATER

3 months (proposed)

Short follow-up survey on skills use, portfolio activity and opportunities pursued.

What is measured

AI basics and prompting · fact-checking · marketing terms · automation concepts · a practical content task scored by rubric · self-rated confidence

Target and quality control

+25 points average gain (proposed). The same rubric is used for the practical task, module deliverables and capstone, so results can be compared.

Results framework: what will be reported

Program completion	Attendance at 80%+ of sessions
Pre/post improvement	Same assessment at start and end
Practical assignments	Module deliverables submitted
Video project	Edited video meets the rubric
Automation project	Workflow runs end to end
Capstone & presentation	Rubric score of 3/4 or higher
Portfolio completion	Published page with 3+ pieces
Freelance readiness	Readiness checklist completed

Key targets (proposed)

- 85% complete the program
- +25 points average gain
- 90% of deliverables submitted
- 85% complete the video project
- 80% build a working automation
- 80% of teams score 3/4+ on the capstone
- 80% publish a portfolio
- 75% meet the readiness checklist

Income is not used as a headline indicator.

Responsible AI, built into every module

Checked tools

Every tool is checked against its terms before each cohort

No real likeness

No real person's face or voice is generated without consent

Protected credentials

API keys and logins are owned and managed by the program

Verify before publishing

Facts are checked against sources; AI content is labelled

Privacy first

No personal data of participants or clients goes into AI tools

Respect copyright

Licensed or self-made assets only, with sources credited

be aware..be secure Green Circle's principle becomes working rules: a code of conduct, a consent form and a checklist in every module.

Delivery and what participants keep

Venue	In person, computer lab at Jubilee Institute*
Rhythm	3 sessions × 3 hours per week, 12 weeks
Team	Lead trainer and assistant trainer per cohort
Cohort	20 participants (proposed)
Set-up	Laptop per participant, stable internet, headsets, recording corner

**Proposed host, subject to mutual agreement.*

Each participant leaves with

- A prompt library and context pack
- A one-page creative brief
- A carousel and five captions with CTAs
- A character sheet and six-image set
- An edited 30–45 second video
- A persona, calendar and campaign
- A working n8n content workflow
- A published portfolio page and case study
