TRAINING CONCEPT NOTE · OCTOBER 2026

AI-Powered Content Creation, Digital Marketing, Automation & Freelancing

A 96-hour, hands-on program that takes young people aged 15–19 from a client's idea to a finished, published campaign.

Working title: AI Creators Program

Young people already use AI. Few learn to use it for real work

Typical starting point	What the program builds
Using AI to get quick answers	**Using AI to produce work a client can use**
Tool tips picked up from social media	**A structured path from idea to published campaign**
Accepting whatever the tool returns	**Checking facts, editing drafts and labelling AI content**
No proof of what they can do	**A portfolio, a capstone project and a live presentation**

The starting point above is an assumption; the pre-assessment in session 1 will confirm it for each cohort.

Built for ages 15 to 19, with no technical background required

15–17

Core track

- Signed guardian consent before tools are used
- Hands-on with tools that allow their age group
- Trainer-led demos for 18+ tools (AI video, AI voice)
- Real-client practice through program-arranged community partners

18–19

Core + 18+ track

- Same curriculum, same hours
- Hands-on with 18+ tools where the program provides access
- Optional deeper practice with AI video and voice
- Guidance on opening their own freelance profiles

Prior experience

None. A laptop, curiosity and the willingness to try

Cohort size

20 students (Proposed)

Language

Arabic delivery (Proposed); most tool interfaces are in English

Short enough to finish in a term. Long enough to build real skills

96
training hours

32
sessions of 3 hours

11
weeks + 1 buffer week

70%
hands-on practice

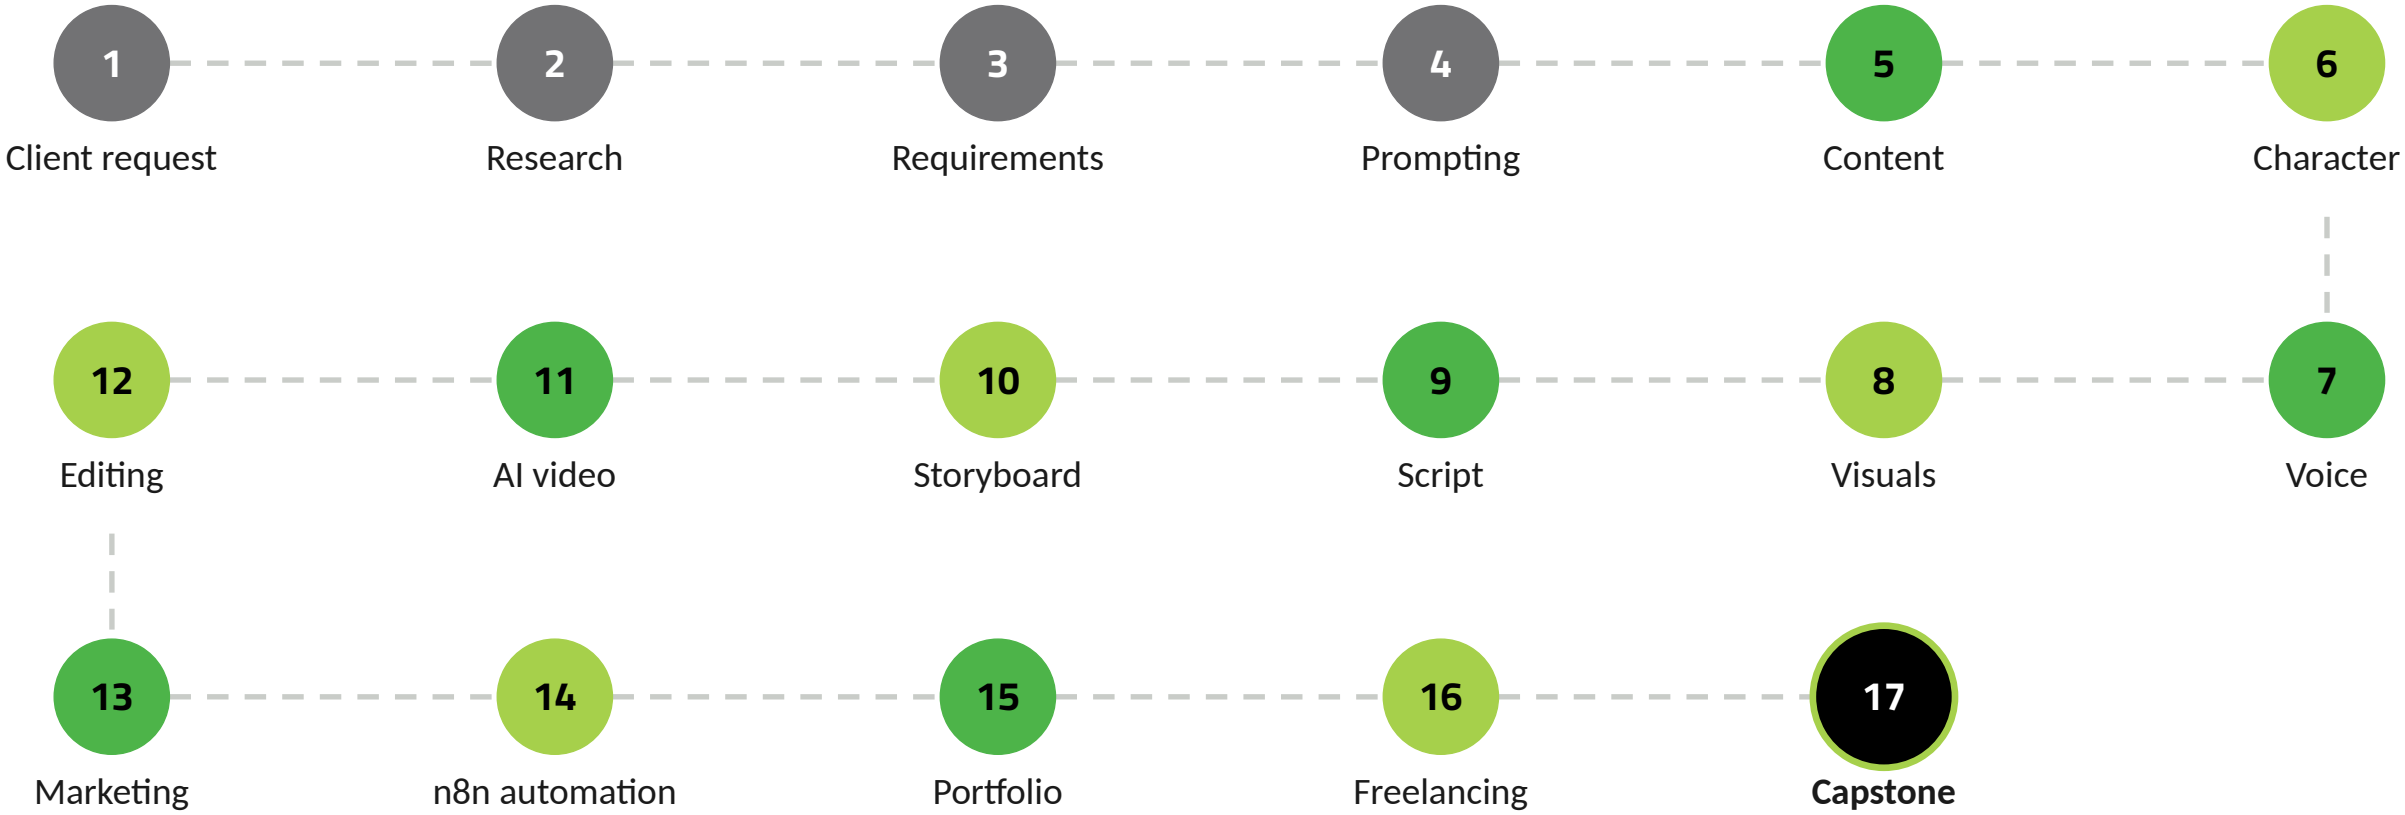

11
modules

1
team capstone project

All figures are design parameters of this proposal, not results.

Every skill builds on the one before it

Students follow the same path a small agency follows with a real client.

Seven tracks, one connected program

Foundation

M1–M3 · 18 hours

AI literacy, responsible use, prompting, context, research and client briefs

Create

M4 · 9 hours

Copywriting, hooks, CTAs and content pillars

Produce

M5–M7 · 33 hours

Characters, voice, visuals, scripts, storyboards, AI video and editing

Market

M8 · 9 hours

Personas, objectives, calendars and campaigns

Automate

M9 · 12 hours

n8n workflows with forms, conditions, Sheets and AI

Launch

M10 · 6 hours

Vibe-coded portfolio, service packages, client communication

Capstone

M11 · 9 hours

Studio work, post-assessment and Demo Day

96

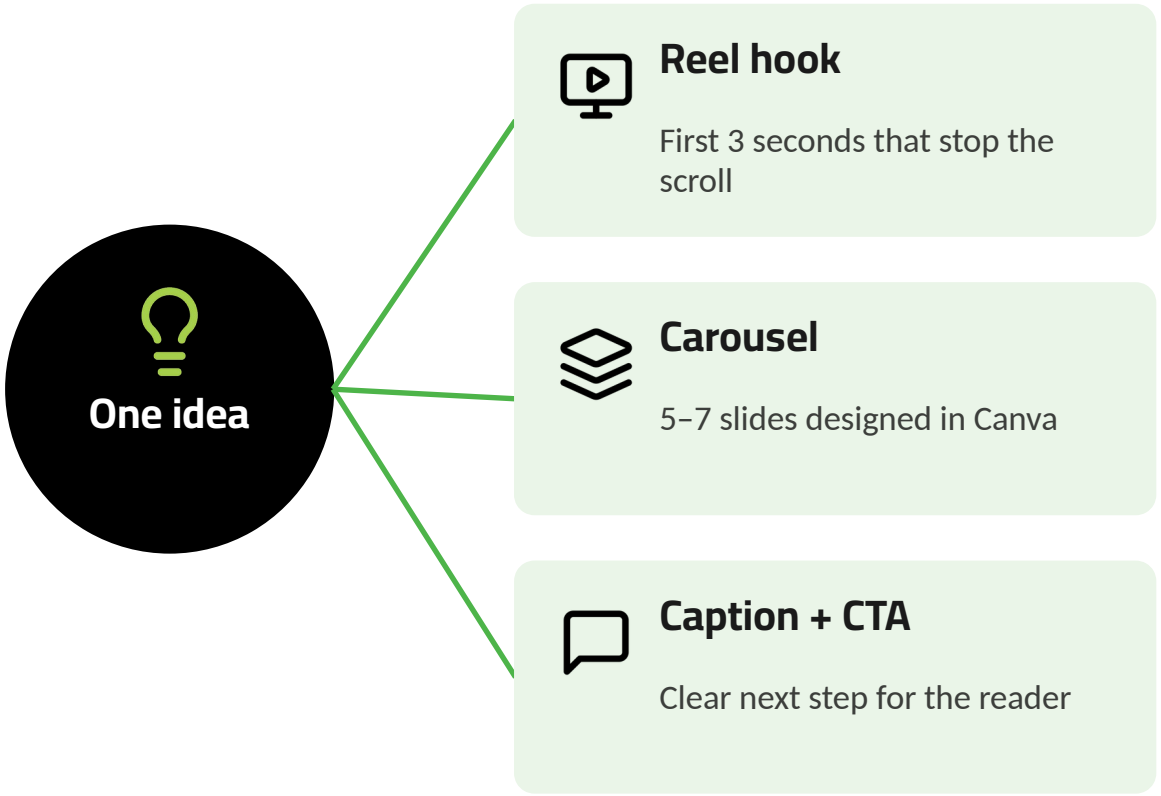

training hours in total

Writing that people stop for, with AI as a drafting partner

Students learn to brief an AI assistant properly, then rewrite its drafts until they sound human and fit the brand. Every exercise starts from a client need, not from the tool.

- Prompt & context engineering
- Research & fact checking
- Creative briefs
- Copywriting (AIDA, PAS)
- Hooks & CTAs
- Content pillars

Tools: ChatGPT · Gemini · Canva

From a character sheet to a finished, captioned video

01

Character

Character sheet + reference images

02

Voice

Voice profile + 30-sec narration

03

Script

30–60 sec two-column script

04

Storyboard

6–10 frames with shot list

05

AI video

Shots generated with continuity

06

Edit & publish

Captions, audio, export

Google Flow and AI-voice tools are restricted to users aged 18+. Students aged 15–17 work from trainer-led demos and build their videos from AI images, recorded narration and their own footage.

Tools: Google Flow · CapCut · Canva · ChatGPT / Gemini image generation · ElevenLabs (18+)

Content only works when it sits inside a plan

Persona

Who exactly are we talking to?

Objective

What should change, and by when? (SMART)

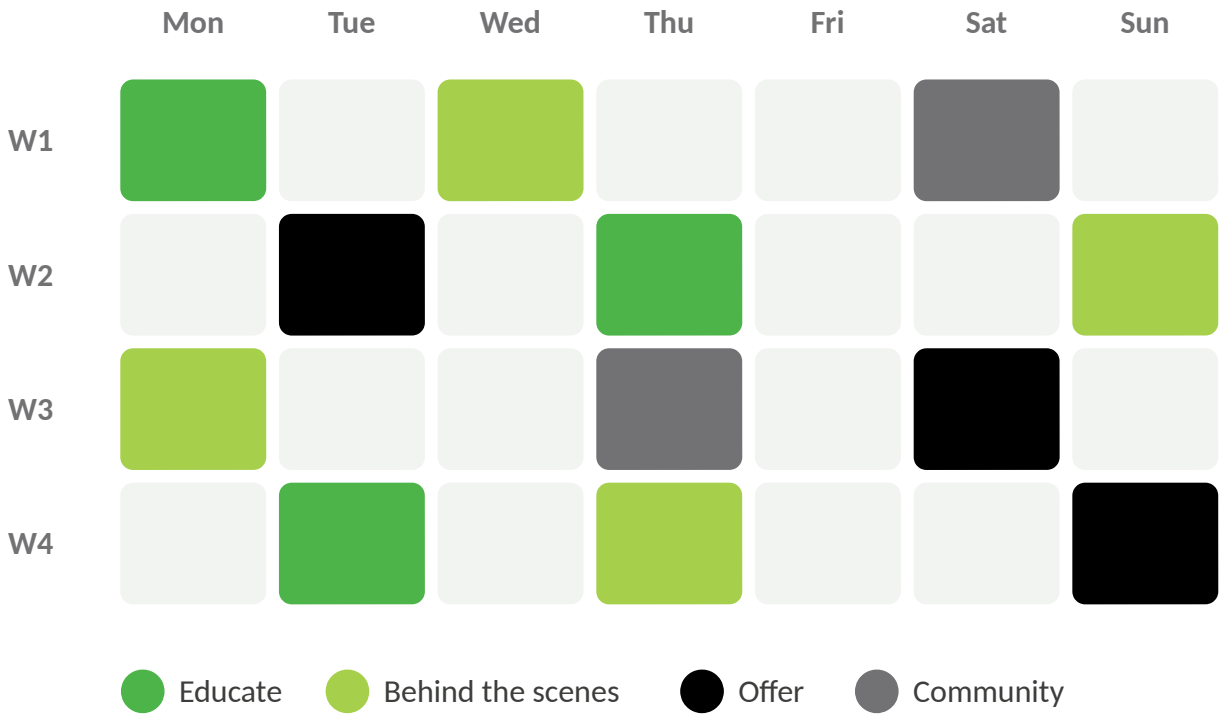

Calendar

What goes out each week, on which platform?

Campaign

One message, one offer, clear measures

Four-week content calendar (sample)

Trigger → Process → AI → Action

GREEN CIRCLE
be aware..be secure

Trigger
Something starts the workflow

→

Process
Data is mapped and checked

→

AI
A model drafts the content

→

Action
Results are saved or sent

Student workflow: Content Idea Generator

Form › Business info › n8n › AI › Hook · Caption · CTA · Reel idea › Google Sheets

- Workflows & nodes
- Manual, form & schedule triggers
- Webhooks (concept)
- Data mapping & expressions
- IF conditions
- Credentials, API keys & OAuth (concepts)
- Credential security

Beginner level by design. No servers, Docker or advanced APIs. Trainers manage all credentials; students never handle real keys.

Leaving with proof of skill and the habits of a professional

Build

A one-page portfolio or landing page, described in plain language, built with an AI assistant, reviewed and published.

Package

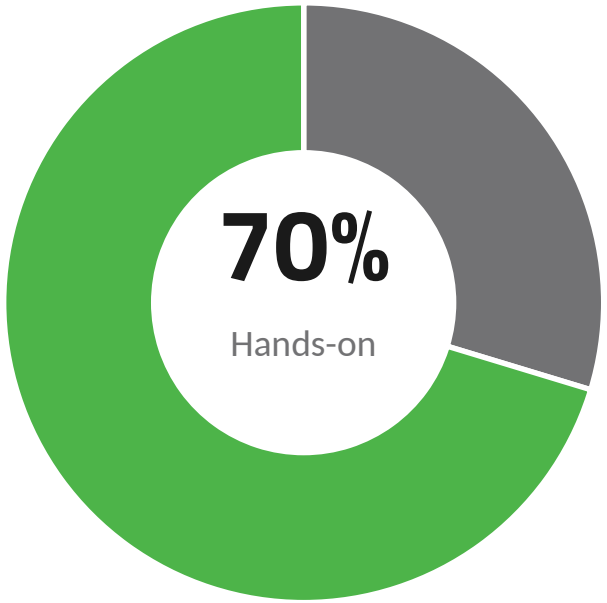

Three clear service offers, each with scope and deliverables. Pricing is outside this program.

Communicate

Message templates for first contact, confirming scope, handling changes and delivering work.

Freelance platforms set their own age rules. Fiverr, for example, requires sellers to be 18+, and allows 13–17-year-olds only through a parent's account. Under-18 students practise with community partners arranged by the program.

Show briefly, then build. Every session ends with something made

- Hands-on: 67.5 h
- Theory: 28.5 h

1. See it

Short concept and live demo

2. Try it

Guided exercise in pairs

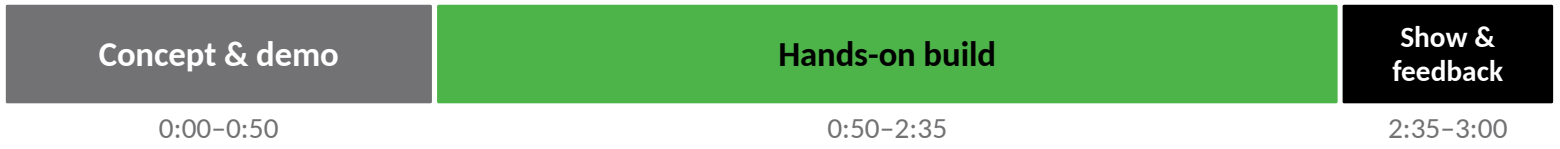

3. Build it

Apply it to the capstone client

4. Show it

Share, get feedback, improve

A typical 3-hour session

AI-Powered Mini Digital Agency

Teams of 3–4 choose a real or realistic client and deliver a complete campaign package.

Small business · NGO · Community initiative · Local shop · Restaurant · Personal brand · Social cause

Discover	Plan	Create	Automate & launch	Present
1 Research	5 Content strategy	8 AI character	16 n8n automation	18 Portfolio case study
2 Client brief	6 Content calendar	9 Voice profile	17 Landing page	19 Final presentation
3 Audience persona	7 Marketing campaign	10 Visual assets		
4 Marketing objective		11 Video scripts		
		12 Storyboard		
		13 AI video		
		14 Edited final video		
		15 Social posts		

Team roles rotate: Strategist · Content lead · Visual & video lead · Automation lead

A portfolio of eight pieces of real work

01

Prompt library

10+ tested prompts and a context pack

02

Creative brief

A one-page brief from a client interview

03

Social content

A carousel and five captions with CTAs

04

Character & visuals

Character sheet and six-image set

05

Short video

An edited 30–45 second video

06

Marketing plan

Persona, calendar and campaign

07

Automation

A working n8n content workflow

08

Portfolio page

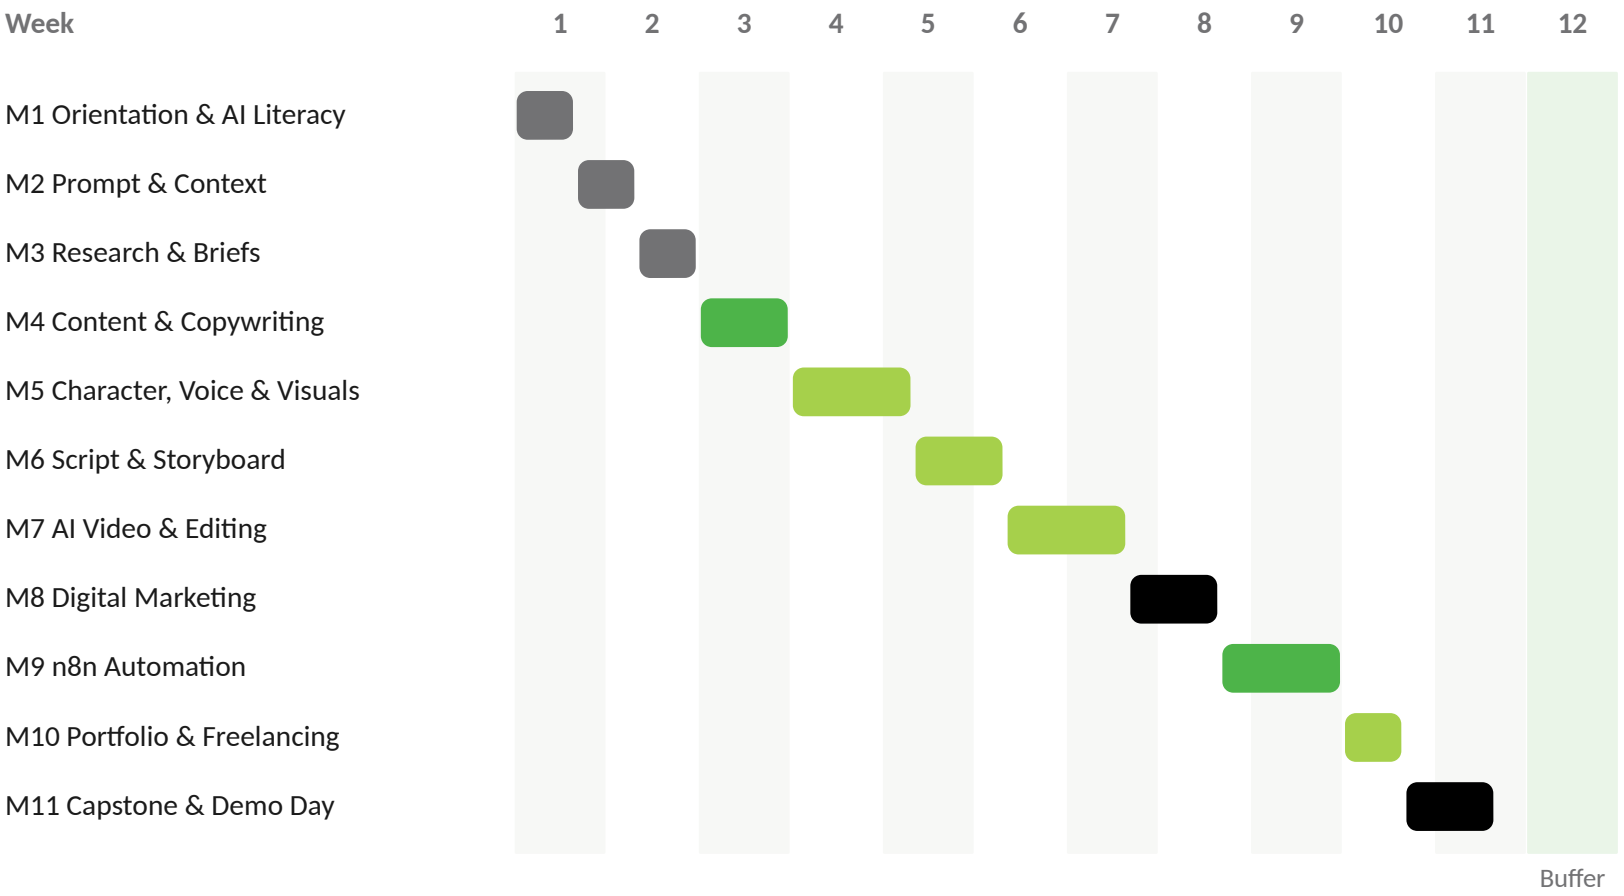

A published page and case study

Success means skills, finished work and readiness, not only income

Indicator	How it is measured	Proposed target
Program completion	Attendance at 80%+ of sessions	**85% of students** Proposed
Pre/post improvement	Same assessment at start and end	**+25 points average gain** Proposed
Practical assignments	Module deliverables submitted	**90% submitted** Proposed
Video project	Edited video meets rubric	**85% of students** Proposed
Automation project	Workflow runs end to end	**80% of students** Proposed
Capstone & presentation	Rubric score of 3/4 or higher	**80% of teams** Proposed
Portfolio completion	Published page with 3+ pieces	**80% of students** Proposed
Freelance readiness	Readiness checklist completed	**75% of students** Proposed

All targets are proposed and should be confirmed with the program team before launch.

Twelve weeks, three sessions a week

Format

In-person, computer lab (Proposed)

Rhythm

3 sessions × 3 hours per week

Team

1 lead trainer + 1 assistant per cohort

Cohort

20 students (Proposed)

Setup

Laptop per student, stable internet, headsets, recording corner

Location & dates

TBD

Responsible AI is built into every module, not added at the end

GREEN CIRCLE
be aware..be secure

be aware..be secure

Green Circle's line becomes a set of working rules in the training room.

Where the rules live

- Code of conduct
- Guardian consent form
- Checklist in every module

Age-checked tools

Every tool is checked against its own age rules before use. 18+ tools are demo-only for under-18s.

Guardian consent

Signed consent for all students under 18, covering accounts and content.

No real likeness

No real person's face or voice is generated or cloned without consent.

Protected credentials

API keys and logins are owned and managed by the program, never shared with students.

Verify before publishing

Facts are checked against sources; AI-made content is labelled.

Privacy first

No personal data of students or clients goes into AI tools.

GREEN CIRCLE
be aware..be secure

NEXT STEPS

What this program leaves behind

Skills

Young people who can take a brief and deliver a campaign

Proof

Portfolios and capstone work that others can see

Habits

Responsible, secure and honest use of AI

Decisions needed before launch

- [x] Delivery location, dates and cohort size
- [x] n8n hosting model and AI provider
- [x] Access plan for 18+ tools (Google Flow, AI voice)
- [x] Community partners for real-client practice
- [x] Demo Day guests and certificate format
