TRAINING PROPOSAL · 96 HOURS · 12 WEEKS

AI CREATORS

صُنّاع المحتوى

AI-powered content creation, digital marketing, automation and freelancing: from a client's idea to a finished, published campaign

GREEN CIRCLE
be aware..be secure

*Proposed host, subject to mutual agreement. AI Creators is a working title.

The program at a glance

96
training hours

32
sessions of 3 hours

70%
hands-on practice

12
weeks, including 1 buffer week

What success looks like

85% complete · +25-point average skills gain · every participant leaves with a portfolio of 8 pieces of work (proposed targets)

The partnership

LEAD	PROPOSED HOST*	PARTICIPANTS
Green Circle	Jubilee Institute	20 per cohort

What Green Circle adds to the partnership

AI expertise	Designs and leads all AI content, labs and coaching
A ready program	11 modules, 96 hours, sessions, tools and a capstone, already designed
Program leadership	One accountable lead for delivery, quality and reporting
Delivery record	References: USAID, CFYE, MoDEE, Q2 Impact
Secure by default	“be aware..be secure”: privacy, credential safety and honest AI labelling in every module

Value for Jubilee Institute

- A complete, hands-on AI content program on its site, with no design burden
- Participants who leave with finished work and portfolios
- A Demo Day the Institute can host and showcase
- Measured, reported results it can cite
- A curriculum that can run again with new cohorts, if agreed

What participants will be able to do

Program objectives

- Practical AI literacy: how AI tools work, where they fail, how to use them safely and honestly
- A repeatable process from client request to published content
- Core content skills: copy, hooks and CTAs, characters, voice, visuals, scripts, storyboards, video
- Digital marketing planning: personas, objectives, calendars, campaigns
- Hands-on automation with n8n
- Presenting work and approaching freelance opportunities responsibly

Learning outcomes: by the end, each participant can

1. Turn a vague request into a one-page brief backed by verified research
2. Write structured prompts and reusable context packs
3. Produce a carousel, captions with CTAs and consistent brand visuals
4. Design an AI character with a character sheet and voice profile
5. Script, storyboard, produce and edit a 30–45 second captioned video
6. Build a persona, a four-week content calendar and a campaign plan
7. Build an n8n workflow (form → AI → Google Sheets) and explain each step
8. Publish a one-page portfolio and describe three service offers
9. Present a team capstone and the decisions behind it

From a client's idea to a published campaign

01
Research & Client Brief

02
Prompting & Content

03
Characters, Voice & Visuals

04
Script & Storyboard

05
AI Video & Editing

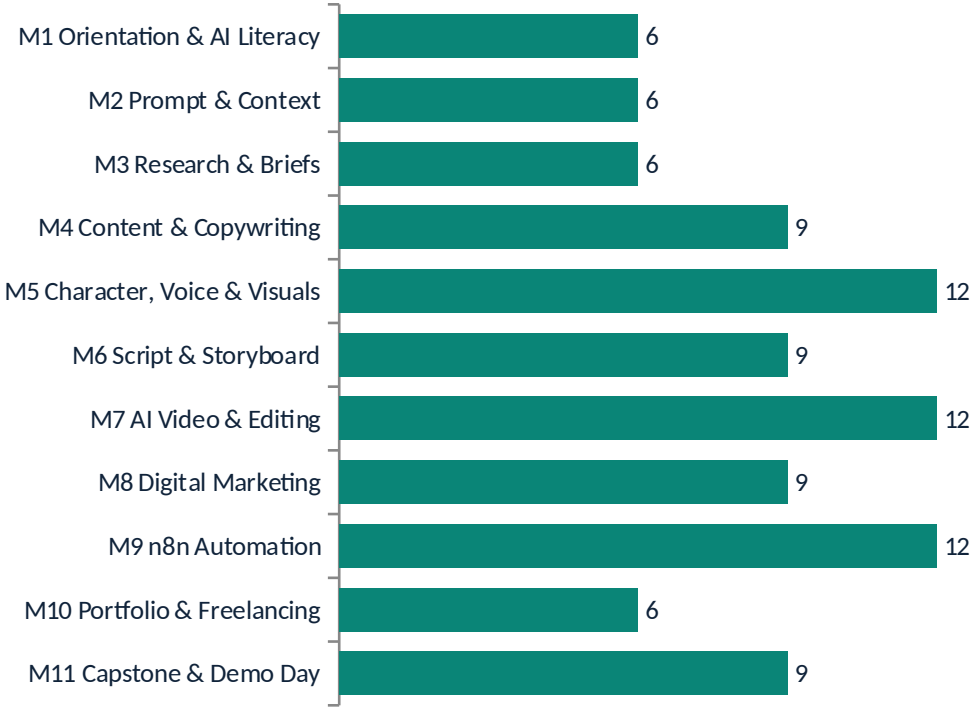

06
Digital Marketing

07
n8n Automation

08
Portfolio & Capstone

Why this focus: many people already use AI for quick answers, but few use it to produce work a client can use. Small businesses, NGOs and community initiatives need steady content and often lack the time or skills to make it. AI Creators trains participants to deliver that work with AI tools, step by step, the way a small agency works with a real client.

Eleven modules, 96 hours per participant

How it is delivered

32 sessions × 3 hours, three a week

28.5 h concept and demo

67.5 h hands-on practice

Every session follows the same loop: see it, try it, build it, show it.

Completion = 80% attendance + capstone. Certificate of completion (proposed).

Eleven modules at a glance

Module	h	Key tools	Participants produce
M1 **Orientation & AI Literacy**	6	ChatGPT, Gemini, Google Forms	Pre-assessment, signed Responsible AI pledge, assistant comparison log
M2 **Prompt & Context**	6	ChatGPT, Gemini, Google Docs	Prompt library (10+ prompts) and one context pack
M3 **Research & Briefs**	6	Gemini, ChatGPT, Google Docs	Verified research sheet and a one-page creative brief
M4 **Content & Copywriting**	9	ChatGPT, Gemini, Canva	Content pillars sheet, one carousel, five captions with CTAs
M5 **Character, Voice & Visuals**	12	ChatGPT / Gemini image generation, Canva, recorded narration, ElevenLabs	Character sheet, voice profile, six-image visual set, 30-second narration
M6 **Script & Storyboard**	9	ChatGPT, Gemini, Google Sheets, Canva	Script and storyboard with shot list
M7 **AI Video & Editing**	12	Google Flow, CapCut, Canva	Edited 30–45 second video and a completed publishing checklist
M8 **Digital Marketing**	9	ChatGPT, Gemini, Google Sheets, Canva	Audience persona, four-week content calendar, campaign one-pager
M9 **n8n Automation**	12	n8n (program-hosted), Google Sheets, AI model node	Working workflow, a hand-drawn or digital flow diagram, and a one-page explanation
M10 **Portfolio & Freelancing**	6	ChatGPT / Gemini (canvas features), GitHub Pages, Google Docs	Published portfolio or landing page, three service packages, client message templates
M11 **Capstone & Demo Day**	9	All program tools	Full capstone package and final presentation

Twelve weeks, three sessions a week

Foundations	Create & produce	Market	Automate & launch	Capstone
M1–M3	M4–M7	M8	M9–M10	M11
Weeks 1–2	Weeks 3–7	Weeks 7–8	Weeks 8–10	Weeks 10–11

1	2	3	4	5	6
W1	**W2**	**W7**	**W9**	**W11**	**W12**
Orientation and pre-assessment	Client brief approved	Edited video	Working automation	Post-assessment and Demo Day	Buffer for make-ups

Sessions run three times a week (proposed). Each module's output feeds the team's capstone, so the final weeks are for finishing, not starting.

Every session ends with something made

1. See it
Short concept and live demo

2. Try it
Guided exercise in pairs

3. Build it
Apply it to the capstone client

4. Show it
Share, get feedback, improve

Concept & demo 0:00–0:50	Hands-on build 0:50–2:35	Show 2:35–3:00

Twelve structured exercises

M1 Spot the error
Fix five AI answers with sources

M2 Prompt upgrade
One prompt, three versions, scored

M3 Fact-check race
Verify six claims with sources

M3 Client role-play
Interview a vague client, write the brief

M4 Hook clinic
Ten hooks, peers shortlist three

M5 One character, four scenes
Keep a character consistent

M6 60 to 30
Halve a script, keep the message

M7 Continuity challenge
Three matching consecutive shots

M8 Campaign sprint
Two-week campaign in 60 minutes

M9 Content Idea Generator
Form → AI → Sheets in n8n

M10 Client inbox
Reply to three client messages

M11 Demo Day dry run
Rehearse with peer feedback

What participants actually do, step by step

Content	One idea	Reel hook	Carousel	Caption + CTA		Carousel and 5 captions
Video	Character	Voice	Script	Storyboard	AI video	Edit & publish	30–45 second video
Marketing	Persona	SMART objective	4-week calendar	Campaign		Campaign one-pager
Automation (n8n)	Form	n8n	AI step	Hook · caption · CTA	Google Sheets	Working workflow
Freelancing	Build a page	Package 3 services	Client messages			Portfolio and offers

Each workflow is practised on the team's capstone client, so every output also becomes part of the final package.

The AI tools participants learn to use

AI assistants

ChatGPT · Gemini

Research, prompting, writing and editing

Design & images

Canva · ChatGPT / Gemini images

Carousels, characters, brand visuals

Video

Google Flow · CapCut

Generated shots, editing, captions

Voice

ElevenLabs · recorded narration

Voice profiles and 30-second narration

Automation

n8n · Google Sheets

Form → AI → Sheets content workflow

Web & portfolio

AI canvas · GitHub Pages

A published one-page portfolio

Capstone: an AI-powered mini digital agency

Teams of 3–4 choose a real or realistic client (a small business, NGO, local shop or community initiative) and deliver a complete campaign package.

Discover	Plan	Create	Automate & launch	Present
1 Research	5 Content strategy	8 AI character	16 n8n automation	18 Portfolio case study
2 Client brief	6 Content calendar	9 Voice profile	17 Landing page	19 Final presentation
3 Audience persona	7 Marketing campaign	10 Visual assets		
4 Marketing objective		11 Video scripts		
		12 Storyboard		
		13 AI video		
		14 Edited final video		
		15 Social posts		

19 deliverables. Team roles rotate: strategist · content lead · visual & video lead · automation lead.

How progress and work are assessed

BEFORE · Session 1

Knowledge check (50) + practical task (50). Baseline, not graded.

DURING · Every module

Deliverable checklists; week-6 mid-point review.

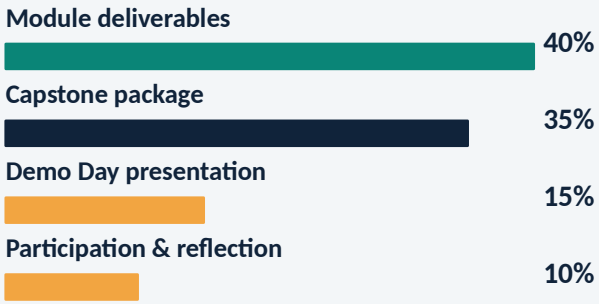

AFTER · Session 32

Same test, parallel questions. Gain = post − pre.

LATER · 3 months

Follow-up survey on skills use (proposed).

Final grade (proposed)

Completion: 80% attendance + capstone submitted.

Capstone rubric (proposed): “meets standard” = 3 of 4

Brief and research	15%	Clear objective; claims verified
Content quality	20%	On-brand copy, strong hooks and CTAs
Visual and video	20%	Consistent visuals; captioned, clean audio
Marketing plan	15%	Persona, SMART objective, realistic calendar
Automation	10%	Workflow runs; team can explain it
Responsible AI	10%	AI content labelled; no misuse of data
Presentation	10%	Clear story of decisions and results

Results framework: what will be reported

Indicator	How it is measured	Proposed target
Program completion	Attendance 80%+	85%
Pre/post improvement	Same test, start and end	+25 pts
Practical assignments	Deliverables submitted	90%
Video project	Meets the rubric	85%
Automation project	Runs end to end	80%
Capstone & presentation	Rubric 3/4 or higher	80% teams
Portfolio completion	Page with 3+ pieces	80%
Freelance readiness	Checklist completed	75%

Freelance readiness checklist

- Published portfolio page with at least three pieces
- Three written service packages with scope and deliverables
- A reusable creative brief template
- Client message templates: first contact, scope, revisions, delivery
- Knows the rules of the platforms they may use
- Has presented work to an audience

Income is not used as a headline indicator.

Responsible AI, built into every module

Checked tools

Every tool is checked against its terms before each cohort

No real likeness

No real person's face or voice is generated without consent

Protected credentials

API keys and logins are owned and managed by the program

Verify before publishing

Facts are checked against sources; AI content is labelled

Privacy first

No personal data of participants or clients goes into AI tools

Respect copyright

Licensed or self-made assets only, with sources credited

be aware..be secure Green Circle's principle becomes working rules: a code of conduct, a consent form and a checklist in every module.

Delivery and what participants keep

Venue	In person, computer lab at Jubilee Institute*
Rhythm	3 sessions × 3 hours per week, 12 weeks
Team	Lead trainer (hands-on content, marketing, AI and n8n) + assistant
Cohort	20 participants (proposed)
Set-up	Laptop per participant, stable internet, headsets, recording corner

**Proposed host, subject to mutual agreement.*

Each participant leaves with

- A prompt library and context pack
- A one-page creative brief
- A carousel and five captions with CTAs
- A character sheet and six-image set
- An edited 30–45 second video
- A persona, calendar and campaign
- A working n8n content workflow
- A published portfolio page and case study
